AMENDMENT AFTER FINAL

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Dear Sir:

In response to the official communication mailed
August 27, 1996, please amend the above application as
follows:

IN THE CLAIMS

Please amend claim 22 according to the following claim 22
(twice amended):

22. (twice amended) In a rotational control apparatus
including an input rotatable about an axis, an output, with
the input rotatable about the axis relative to the output,
and first and second drive components carried by the input
and output, respectively, for rotatably relating the input
and the output, the improvement comprising, in combination:
an annular body portion including first, second, third, and
fourth quadratures, with one of the first and second drive
components mounted to the annular body portion; and
circumferentially spaced cooling fins formed on the annular
body portion opposite to the one of the first and second
